EDUCATION

- **Institute of Engineering and Technology** Nov 2021 - June 2025
B. Tech. - Computer Science and Engineering GPA: 7.92

EXPERIENCE

- **Kraya AI(MiM-Essay)** Feb 2025 - August
Software Development Engineer
 - Built B2B dashboard for Kraya serving **200+** businesses with **AI-powered** sales automation, reducing manual follow-up time by **60%** through automated calls and message responses.
 - Migrated WhatsApp messaging system from WATI to Kraya's native API for template messages, improving delivery rates by **35%** and reducing operational costs .
 - **Tech Stack:** Next.js, Redux, MUI, Axios,SQL,AWS,Git,Github
- **Global EBrand Inc** Oct 2024 - Dec 2024
Web Development Intern
 - Developed RESTful APIs using NodeJS to retrieve store details and implemented filters, optimizing performance and reducing response time by **20%**.
 - Developed and integrated a dynamic frontend upsell funnel using React.js, featuring pre-purchase and post-purchase offers that enhanced user experience and significantly increased average order value.
- **SmartDagg Private Limited** July 2024 - Oct 2024
FullStack Developer
 - As a fullstack developer at SmartDagg Private Limited, I specialize in creating customized websites for clients. My role involves working on front-end development, ensuring seamless and efficient web solutions tailored to meet diverse client needs.

PROJECTS

- **Campground Master**
 - This user-friendly campground application allows users to search, create, review, and rate grounds. It features a complete authentication flow with Passport.js and fully functional CRUD routes. Additionally, it supports image uploads via Cloudinary and automatic geocoding of ground addresses using the Maptiler.
 - **Tech Stack:** NodeJs, ExpressJs,MongoDB,EJS,Maptiler,Cloudinary,
- **ConnectU**
 - Developed ConnectU, a full-stack web app for secure user registration, login, and photo uploads, with keyword search and pagination for easy photo management. Built with React.js, Node.js, Express.js, and MongoDB, featuring JWT-based authentication, bcrypt-secured passwords, and a responsive design for seamless multi-device use.
 - **Tech Stack:** ReactJS,Redux,MUI, Mongo DB,ExpressJS

ACHIEVEMENTS

- **Codeforces:** Specialist with a maximum rating of 1460.
- **Leetcode:** Knight with a maximum rating of 2100.
- **Codechef:** 4-Star with a maximum rating of 1810.
- **Mentor at Fractal(Coding Club):** Mentored More than 200+ students about compctetive programming & DSA
- **Google Hashcode 2022:** Ranked 3071 in the Qualification Round.
- **Problem Solving:** Solved 2000+ problems on Codeforces, Codechef, and Leetcode.

SKILLS SUMMARY

- **Languages:** C/C++, JavaScript,SQL,NoSQL(MongoDB),Python
- **Frameworks:** Node.js, Express.js, RESTful APIs, React.js,Nextjs,Material UI,Redux
- **AI/ML Toolkit:** Tensorflow, LangChain, LangGraph,Neural Networks,Transformer,Fine Tuning,VectorDBs.
- **Tools:** Git, GitHub,MySQL Workbench Postman,Langsmith, Docker, VS Code, Cursor,MCP
- **Major CourseWork:** Data Structures, Algorithms,Computer Networks, Operating Systems,DBMS,OOPs
